Transforming learning & working environments everywhere....

The Polaris Interactive Touchscreen replaces your whiteboards, flipcharts and dated projectors. Utilise in-built whiteboarding, web browsing and file management to save, re-use and share valuable content your team creates, all without a PC or laptop connected.

Refresh your meeting space, or boardroom with our latest collaboration and presentation device – the Polaris Interactive Touchscreen. No matter whether Instant digital whiteboarding, Collaborative Video Conferencing, browsing web or accessing the 365 suite and documents, Polaris Interactive Touchscreens will improve and enhance teamwork and collaboration in your workspaces.

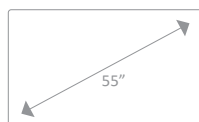

The smart stylus interfaces directly with Office 365.

Draw, write or highlight text with digital ink, advance through slides and navigate your way through spreadsheets remotely.

The Polaris Interactive Touchscreen Active Stylus heightens the overall user experience. With effortless wireless charging, it is always ready when you need it. Featuring pressure sensitivity, an eraser and palm rejection, it could not be easier to start annotating. Point at images and text from anywhere in the room using the virtual laser function, or advance/backtrack through presentations with the next and previous smart buttons.

REVOLUTIONISE THE WAY YOUR BUSINESS CAN COLLABORATE, INTERACT, LEARN & COMMUNICATE... POLARIS TOUCHSCREENS

Elevated Performance

Exceptionally designed from start to finish, Polaris Interactive Touchscreens will elevate not only the aesthetics of any room it features in, but the functionality and flexibility of the space. Give presentations life with the a Polaris Interactive Touchscreen, featuring **PCAP Technology**, beautiful **edge-to-edge glass** and exceptionally sharp, bright images in flawless **4K resolution**. It really is the ideal collaboration, communication and presentation tool.

Complete VC Flexibility

When it comes to video conferencing, the Polaris Touchscreen is **software and hardware agnostic**. That means you can customise the system to your preference. Choose your video conference software, camera and microphone and the Polaris Touchscreen will seamlessly integrate with them.

Investment in the Future

Polaris Interactive Touchscreens not only provides stunning graphics and video, but also the peace of mind that all rooms are **future proofed**. Additionally, if you use your Polaris Touchscreen 8 hours a day, every day, it will last 12 years.

A culmination of touch, audio & visual engagement...

Stimulate all the senses with stunning visual clarity, rich premium audio and a superior touch experience. Utilising the same **projected capacitive touch technology** as your smart phone or personal device, with an impressive, highly responsive 20 points of touch and 1mm object recognition, this next generation projected capacitive touchscreen is the pinnacle in collaborative technology. Featuring **4K resolution**, **anti-glare glass** and now with **blue light eye-care** and **built-in subwoofer**, the Polaris Touchscreen is the heart beat of any meeting room.
