COMMUNICATION UNLEASHED

The HD Wireless™ Headset is about freedom in the endless world of communication. It is about flexibility and simplicity, as well as being able to access the world beyond the desktop.

The HD Wireless Headset has been specifically designed for the Office, combining excellence in communication with the freedom to move away from your desk. This convertible headset keeps the essential call controls at your fingertips, both at your desk and away from it, and allows busy workers to multitask during a call.

THE EXCELLENCE OF HIGH DEFINITION (HD) WIDEBAND SOUND.

The future of communications is all about HD Wideband Sound - clear, crisp, pure and comfortable sound quality. Providing the highest level of HD Wideband Sound, the HD Wireless Headset captures voice perfectly as well as the important subtleties of music and other audio files.

CONNECT TO THE OUTSIDE WORLD.

The HD Wireless Headset allows you to effortlessly switch between desk-phone and PC. So whether your company uses desk-phones, has moved over to softphone or uses a combination of both, the HD Wireless Headset is able to work with any telephony system. And when your organisation is ready to fully embrace Unified Communications applications such as Skype™ for Business / Lync™ or Cisco® WebEx®, the HD Wireless Headset will be ready too. It completes your connection to the world of UC.

TOUCHSCREEN CONTROL.

Complicated switches and confusing user guides are a thing of the past as we bring you simple and intuitive controls at your fingertips through a large, full colour touchscreen; the largest and most intuitive touchscreen of any wireless headset.

HD WIRELESS HEADSET DATASHEET

HIGH DEFINITION (HD) WIDEBAND SOUND

Excellent Voice Quality.

150Hz - 8KHz Audio bandwidth using Wideband and IP telephony

Digital Sound Processing (DSP) technology provides the best HD Wideband voice processing in any wireless headset and ensures excellent intelligibility and sound quality.

LARGE ERGONOMIC AND INTUITIVE COLOUR TOUCHSCREEN

User friendly Touchscreen provides visual feedback on all call controls and settings. No buttons or mechanical switches on the base unit means that you can easily control every call.

3.5" 320 x 240 resolution

Easily manage Volume Control, Microphone Level, Tone, Display, Mute PC/Desk-phone Switcher and Conference Calls.

DUAL CONNECTIVITY

Easily switch from traditional Desk-phone to Softphone.

Connects to Desk-phone, PC, Mac and Laptop

The Phone/PC functionality is perfect for companies that still use desk-phones but whose staff also need to access softphone, web-based audio documents, participate in webinars and conduct PC based video conferencing.

WIRELESS RANGE

Flexibility to move away from your desk while on a call.

Up to 150m in a standard office environment (over 200m line-of-site)

The DECT wireless range provides you with flexibility to perform other duties while on a call, eg. retrieve documents from the printer.

LONGEST TALK TIME

Your headset battery will last all day

13+ hours talk time in narrowband mode

9+ hours talk time in wideband mode

The inbuilt Dynamic Range Control in the HD Wireless Headset automatically adjusts the amount of battery power it uses, making sure you get the most life out of your headset battery.

BATTERY RECHARGE TIME

Fast Battery Recharge.

0% - 50%: 1 hour

0% - 100%: 2 hours

In case your headset has not been placed back on the charger overnight, the HD Wireless Headset's Fast Recharge feature ensures you're able to use your wireless headset again with minimum downtime.

TALK AND CHARGE

No battery downtime and no need for extra base stations or chargers.

Simultaneously talk on one HD Wireless headset while charging another

The HD Wireless Headset allows you to charge a second headset and continue talking on the primary headset without any interruption to your call. The feature minimises headset battery downtime and supports simple yet affordable desk sharing.

LIGHTWEIGHT CONVERTIBLE HEADSET

Designed for comfort.

Ear hook - 22g

Headband - 44g

The HD Wireless Headset is extremely lightweight and has been designed for all day comfort.

HD WIRELESS HEADSET

DATASHEET

NOISE-CANCELLING HEADSET MICROPHONE

Minimises background noise so that your voice is transmitted clearly.

The boom length has been designed to boost the performance of the noise-cancelling headset microphone and enhance wind noise reduction.

This is particularly important in noisy, open plan offices and where people work in close proximity to each other.

PROVEN ACOUSTIC SHOCK PROTECTION

Total Protection from Acoustic Shock caused by sudden and unexpected loud noises and high pitched sounds.

Uses Sonaron™ Patented Shriek Rejection™ Software

This ensures that these sounds will never reach the ear of the headset user and the risk of acoustic shock injury is completely eliminated.

NOISE EXPOSURE PROTECTION

Protects you from long term exposure to loud noise.

Configurable decibel limit

Allows sound levels to be lower than the ACIF G616 Guidelines, and help you meet the requirements of the National Standard for Workplace Noise NOHSC:1007:2000.

ADDED PROTECTION IN THE HEADSET

Additional protection exclusive to Polaris wireless headsets.

Wideband acoustic limiter housed within the headset

Together with the Sonaron patented Shriek Rejection software in the headset base, the HD Wireless Headset provides the highest level of acoustic protection.

REMOTE CALL CONTROL

Answer and End Calls while away from your desk.

Via Handset Lifter or Electronic Hook Switch (EHS)

An EHS adaptor or Handset Lifter gives you complete call control via your HD Wireless Headset from up to 150m away from your telephone, increasing your productivity and efficiency.

MULTI-UNIT CONFERENCING

Easily conduct conference calls or wireless training.

Up to 4 headsets

The HD Wireless Headset's intuitive touchscreen provides you with a simple interface to easily initiate and conduct conference calls and wireless double-jacking.

TOUCH PAIRING

Hassle-free and effortless pairing.

Instant headset recognition

Simply dock your headset to the base for pairing to occur. Touch pairing makes desk sharing, double-jacking and phone conferencing quick and easy.

DECT TECHNOLOGY

DECT Technology (Digital Enhanced Cordless Telecommunications).

1880-1900 MHz

Designed for high density usage, the HD Wireless Headset operates on a 1.8GHz frequency which is exclusively allocated for transmission by telecommunications equipment within Australia, New Zealand, UK, Europe and some Asian and South American countries.

UNIVERSITY COMPATIBILITY

Easy to set up on any hardware or application.

Desk-phone, PC or Mac

Compatible with Skype™ for Business / Lync™, Cisco®, WebEx®, VoIP and other Softphone Applications.

Plug and play solution assures universal compatibility of the HD Wireless Headset with all host telephone handsets.

HD WIRELESS HEADSET DATASHEET

SAFETY & COMPLIANCE

Assurance that the HD Wireless Headset meets the relevant safety standards.

The HD Wireless Headset meets the test requirements of the Australian Industry Standard AS/ACIF S004:2008 and AS/NZS 60950.1:2011 as well as the European standard EN 60950-1:2006.

3 YEAR WARRANTY

Peace of mind that you are using a high quality product.

Longest Warranty for a wireless headset

At Polaris we proudly stand by the HD Wireless Headset by providing a 3 year warranty which is longer than any other wireless headset warranty. Batteries are covered by a 1 year warranty.

POLARIS CUSTOMER SERVICE

The most comprehensive customer service in the industry!

All Polaris customers in Australia are supported by the Polaris Customer Service team which is a highly experienced group of customer service executives available to assist with everything from:
